

KINGFISHER ADMIX

DESCRIPTION.

Kingfisher ADMIX is a concentrated solution based on VINSOL RESIN, conforming to BS 4887 Mortar Plasticisers.

Kingfisher ADMIX is a plasticiser which, when used in cement, render and mortars is highly effective in improving their workability without the addition of lime. ADMIX also reduces the water: cement ratio, increases adhesion and provides increased resistance to frost down to -2°C.

METHOD of USE.

Gauging water should be made up by adding 1 part **Kingfisher ADMIX** to 40 parts clean water. Mix thoroughly before adding to cement and aggregate.

DO NOT EXCEED THE RECOMMENDED DOSAGE.

Lime can be incorporated into the mix if required although this is not required when ADMIX is used.

Alternatively **Kingfisher ADMIX** can be added directly to the mix at a rate of 0.125 – 0.25 litres per 50kgs of cement.

SAFETY.

Kingfisher ADMIX is an alkaline product and is classified as an irritant. ALWAYS read the label before use.

Further detailed product safety information is provided on the Kingfisher Safety Data Sheet, copies of which are available from the Kingfisher Technical Dept. Tel 01229 869100. or Fax 01229 869101.
