

KINGFISHER MICRO KX-5 SANITISER AND FLOOD DAMAGE DISINFECTANT

DISINFECTION, CLEANING & SANITISATION

Apart from the obvious remedial work required to a property that has been subject to flood Water, a very important treatment the disinfection, cleaning, cleaning and sanitisation should never be overlooked

Flood waters carries with it many types of bacteria, viruses etc. Once the flood water has subsided these bacteria and viruses remain within the plaster, timber joists/ floorboards, fixtures and fittings.

All these areas should be properly disinfected and sanitised before reinstatement works are carried out and the property is re occupied.

MIXING.

Kingfisher MICRO KX-5 is a concentrate solution supplied in a sachet which when dropped into 25 litres of clean water and gently stirred will dissolve and produce a solution which will control a broad range of bacteria, including hepatitis, salmonella, listeria, MRSA and many others.

APPLICATION

Kingfisher MICRO KX-5 can be applied with spray or brush

COVERAGE.

Depending upon the porosity of the surfaces to which the solution is applied coverage should be approximately 3 – 4 mts per litre.

HEALTH & SAFETY

In its concentrated form **Kingfisher MICRO KX-5** is corrosive and could cause burns if the sachet is opened and therefore should only be dissolved in water as directed..
