

# Weatherflex<sup>TM</sup>

The Ultimate Flexible Masonry Paint

...a coating for all seasons

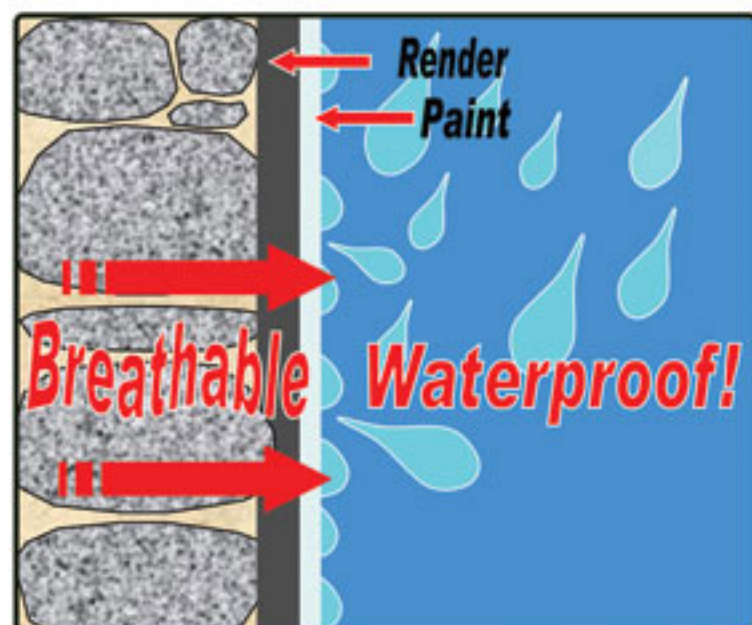

- **Guaranteed 15 years**
- **Breathable**
- **Waterproof**
- **Repels Dirt**
- **Outstanding Adhesion**

Kingfisher's premium grade "Weatherflex" coatings have been protecting Lakeland homes in all seasons and all weathers for more than twenty years. Originally developed as a flexible, waterproof coating, sympathetic to our unique Cumbrian fell stone, "Weatherflex" has gradually earned a national reputation for durability, weather protection and depth of colour.

Our broad expertise in the field of structural waterproofing has always been heavily influenced by our Lakeland location, which has been so instrumental in the continuous testing and improvement of our products. But "Weatherflex" in particular has benefitted from years of development in this harshest of nature's proving grounds.

This latest range of "Weatherflex" coatings therefore represents a culmination of incremental technological progress and includes new colours inspired by the Lakeland landscape whose demanding climate and raw beauty has been so integral to the development of the "Weatherflex" range. From the coastal sands of Silverdale to the depths of Wast Water there are colours to inspire your project wherever it may be.

**Application:** Brush or Roller  
**Coverage (flat surfaces):** 8 to 10 sq m / ltr  
**Coverage (Irregular surfaces):** 5 to 6 sq m / ltr  
**Sizes:** Tester (75 ml), 5 ltr & 10 ltr

## Weatherflex Colours

Colours are approximations only, so we recommend that you order a tester before making your final colour choice.

BRILLIANT WHITE	BUTTERMERE BEIGE	MAGNOLIA	ENNERDALE STONE	GARDENIA
CORNISH CREAM	SILVERDALE SAND	WILD MUSHROOM	GRASMERE GREEN	LAKELAND BLUE
BRICK RED	BASSENTHWAITE GREY	CONISTON SLATE GREY	WAST WATER BLACK	

Our range of “Kolourseal” sprayable wall coatings are designed with the professional applicator in mind. “Kolourseal Approved” applicators can offer a 10 year Dual guarantee with “Kolourseal” advanced wall coatings. “Kolourseal” coatings are specially formulated and filtered for application using high pressure airless spray systems and allow exterior coating professionals to efficiently cover hundreds of square metres per day. “Kolourseal” wall coatings are manufactured using high-bond styrene acrylic polymers which offer superior adhesion and durability compared with standard masonry paints. “Kolourseal” coatings are micro-porous (breathable), weatherproof and offer class leading depth of colour and finish on a wide variety of masonry, stone and concrete surfaces.

**Application:** Spray / Brush / Roller

**Coverage:** 4 to 6 sq m / ltr

**Sizes:** Tester (75 ml), 20 ltr

## Kolourseal Sprayable Wall Coating Colours

Colours are approximations only, so we recommend that you order a tester before making your final colour choice.

## PRE-TREATMENT PRODUCTS

### Weatherflex Stabilising Solution

- paint straight after rendering
- binds & primes chalking surfaces
- improve paint adhesion
- stabilise flaky residues

"Weatherflex Stabilising Solution" allows you to effectively stabilise or harden "less than perfect" walls or substrates in preparation for the application of "Weatherflex" or "Kolourseal" coating.

**Size:** 5 ltr

**Coverage:** 4-5 sq m / ltr (even surface)

**Application:** Brush / Roller / Low pressure spray.

### Kingfisher Bio-Wash

"Kingfisher Bio-Wash" is a deeply penetrating aqueous biocide solution which kills moulds, algae, moss and lichens on external walls and hard surfaces. Walls contaminated with moss or other organisms must be pre-treated with Bio-Wash to avoid re-growth under the new coating.

**Size:** 5 ltr

**Coverage:** 5 ltr makes 25l tr, treats up to 120 sq m.

**Application:** Garden sprayer / Deck scrubber.
